Stock reference

The paper game ships a printed reference card. The digital one can do the thing cardboard cannot: show where every corporation actually stands right now, under the current names. Opens from the **Reference** button in the header, from any price in the market, or with ?; a single corporation card opens by clicking its card in the band.

The full chart every tier, every band, with the market's live positions marked

Classic ruleset · price and bonuses by corporation size · highlighted rows are where the market stands now

TIER 1	TIER 2	TIER 3	SHARE	SHAREHOLDER BONUS
Chapter Eleven, Radio Hut	Pan-Atlas, Enrun, Blackcurrant	Megahitvilas, Toys Я Were		
2	—	—	\$200	\$2,000 \$1,000
3	2	—	\$300	\$3,000 \$1,500
4	3	2	\$400	\$4,000 \$2,000
5	4	3	\$500	\$5,000 \$2,500
6–10	5	4	\$600	\$6,000 \$3,000
11–20	6–10	5	\$700	\$7,000 \$3,500
21–30	11–20	6–10	\$800	\$8,000 \$4,000
31–40	21–30	11–20	\$900	\$9,000 \$4,500
41+	31–40	21–30	\$1,000	\$10,000 \$5,000
—	41+	31–40	\$1,100	\$11,000 \$5,500
—	—	41+	\$1,200	\$12,000 \$6,000

Majority is always ten times the share price and minority five times. A merged corporation prices on the **survivor's** tier — Megahitvilas is tier 3 whatever it swallows.

The whole table is generated from the ruleset. The 2015 preset renders different bands and a third bonus column, from the same component.

Merged names

A corporation keeps three quarters of its own name forever, and adds a piece of everything it swallows. The name never resets and never truncates, so by the endgame the market leader is wearing its whole history — and is unpronounceable.

The rule

a stem, then one fragment per acquisition

The stem, once

75% of the base name, taken at founding and never shortened again

M

A card is one slot wide per corporation it contains, so the band is always the same total width and a corporation has exactly as much room as it has earned. The long-name problem solves itself — and so does the long-flavour problem, because the promises pile up at the same rate the name does.

What the rule has to respect

the parts that touch the rest of the engine

Derived, never stored

A corporation is a base name plus an ordered list of what it has eaten. The display name is computed from those two, so it can never drift out of sync, and changing the rule re-renders history rather than corrupting it.

Refounding resets

A returned headquarters comes back under its own name. A player holding Enrun stock from four mergers ago is holding Enrun stock, not a fragment of somebody else's.

Multi-mergers append twice

A tile joining three corporations resolves defunct chains largest-first and appends one fragment per defunct, in that order. One placement can add two fragments.

Two names, always

The base name belongs to the headquarters marker. Held defunct stock, refounding and the tile badge all key off it. Only the display name accretes.

The badge never moves

The stem is taken from the front, so the initial on the headquarters tile is fixed for the whole game. Colour is fixed for the same reason — neither is derived from the display name.

A blocklist is not optional

Concatenating fragments of seven brands will eventually produce something unshippable. Check the assembled result and fall back to the next syllable boundary, not to the unblended name.

Configuration

all of it, one object

mergeNaming.enabled	true	off entirely, and survivors keep their own names
mergeNaming.stem	0.75	share of the base name kept, from the front, computed once
mergeNaming.fragment	lastSyllable	or a flat character count, if syllables feel too clever
mergeNaming.minFragment	3	letters, so a one-syllable name still contributes something
mergeNaming.maxFragment	6	letters, so a long word cannot swamp the stem
mergeNaming.flavour	concat	the survivor inherits every flavour line it swallowed
pool.onePerIndustry	true	seven drawn per game, one from each industry
mergeNaming.collapseSeam	true	drop a doubled letter where a fragment joins
mergeNaming.blocklist	[...]	checked against the assembled name, not the fragments

The pool

Every company here was once the biggest thing in its category, and then it was eaten — which is the only thing that happens on this board. A game draws one from each industry, so there are always seven, always one of each, and the marks on the board stay unique. The highlighted row is the draw the table is showing.

Tinseltown Video	new releases and 42 copies of 'Next Friday'	Hollywood Video
Fotomatic	one hour, one kiosk, one photo	Fotomat
Tower of Records	listening booths, teenage employees and no returns	Tower Records

The right-hand column is a design note, not a shipping string — it is here so the list can be reviewed, and it should not appear anywhere in the product. Tier and colour belong to the industry rather than the company, so swapping a name in or out changes nothing about balance. Adding a name means adding a row.

Rules model

Reconciled from the 2015 Avalon Hill rulebook and the classic rules. Where the two disagree the difference is configuration, not a fork — the column on the right of each divergence is the key the engine reads.

PLAYERS	CORPORATIONS	SHARES EACH	START CASH
2 – 6	7	25	\$6,000

Turn one placement, an optional purchase, a draw

1 · Place a tile Mandatory if any tile is playable. Exactly one outcome fires.	>	2 · Buy stock Up to 3 shares total, any mix of <i>active</i> corporations. Optional. Bank stock and cash both cap it.	>	3 · Draw Draw back to six tiles.	>	4 · Dead-tile sweep Discard permanently unplayable tiles face-up, draw replacements. 2015 only.	>	5 · End check Player <i>may</i> announce the end if a condition holds. Never forced.
PLACEMENT OUTCOMES		Nothing No orthogonally adjacent tile. Tile simply sits unincorporated.		Found Adjacent to one or more unincorporated tiles and no corporation. Founder picks any free headquarters, places it on any tile of the new group, and takes 1 free share — <i>if the bank still has one</i>. Blocked while all 7 headquarters are in play; the tile stays in hand and is not dead.		Grow Adjacent to exactly one corporation. That corporation absorbs the tile and any unincorporated tiles it touches.		Merge Adjacent to two or more corporations. Largest survives; mergemaker breaks size ties. Illegal if it would dissolve a safe corporation — two safe corporations can never merge.

Merger resolution the only part of the game with real sequencing

a Count sizes <i>before</i> the merging tile The placed tile never counts toward either corporation when sizes, prices or bonuses are determined. It joins the survivor afterwards.
b Rank the corporations Largest survives. On a tie the mergemaker chooses the survivor. With three or more, every smaller corporation goes defunct at once.
c Resolve defunct corporations one at a time, largest first The mergemaker breaks ties in ordering. Each is fully resolved before the next begins.
d Pay stockholder bonuses Priced by the defunct corporation's size before the merger. Ties resolved per the table below. Nothing is paid on the surviving corporation.
e Dispose of defunct stock — mergemaker first, then clockwise Each holder may split their shares across hold, sell (at the defunct price) and trade (2 defunct → 1 survivor). Trading is capped by the survivor's remaining bank stock.
f Return the headquarters The marker goes back to the tray and can found a new corporation of that name later. Held shares of that name become live again if it is refounded.

Edition configuration every divergence between the two rule sets

RULE	2015 AVALON HILL	CLASSIC	CONFIG KEY
Board	100 tiles, dimensions not stated in the rulebook	12 × 9 = 108 tiles, 1A – 12I	boardCols / boardRows
Safe size	10 or more tiles	11 or more tiles	safeSize
End trigger	one corporation at 38+	one chain at 41+	endChainSize
Bonus tiers	primary · secondary · tertiary	majority · minority	bonusTiers
Price bands	2, 3, 4, 5, 6–7, 8–17, 18–27, 28–37, 38+	2, 3, 4, 5, 6–10, 11–20, 21–30, 31–40, 41+	priceBands
Sole shareholder	takes primary <i>and</i> tertiary	takes both bonuses	soleHolderPolicy
Dead tiles	discarded face-up and replaced at end of turn	not addressed — tile stays in hand	deadTilePolicy
Two-player rule	the bank is a shareholder; its holding is drawn from the tile pile each merger	not addressed	phantomShareholder

Price and bonus table the numbers, exactly as printed

CL · T1	CL · T2	CL · T3	15 · T1	15 · T2	15 · T3	SHARE	PRIMARY	SECONDARY	TERTIARY
2	—	—	2	—	—	\$200	\$2,000	\$1,500	\$1,000
3	2	—	3	2	—	\$300	\$3,000	\$2,200	\$1,500
4	3	2	4	3	2	\$400	\$4,000	\$3,000	\$2,000
5	4	3	5	4	3	\$500	\$5,000	\$3,700	\$2,500
6–10	5	4	6–7	5	4	\$600	\$6,000	\$4,200	\$3,000
11–20	6–10	5	8–17	6–7	5	\$700	\$7,000	\$5,000	\$3,500
21–30	11–20	6–10	18–27	8–17	6–7	\$800	\$8,000	\$5,700	\$4,000
31–40	21–30	11–20	28–37	18–27	8–17	\$900	\$9,000	\$6,200	\$4,500
41+	31–40	21–30	38+	28–37	18–27	\$1,000	\$10,000	\$7,000	\$5,000
—	41+	31–40	—	38+	28–37	\$1,100	\$11,000	\$7,700	\$5,500
—	—	41+	—	—	38+	\$1,200	\$12,000	\$8,200	\$6,000
Tier 1 = Chapter 11, Radio Hut · Tier 2 = Pan-Atlas, Enrun, Blackcurrant · Tier 3 = Megahit Video, Toys Я Were. Primary is always 10× the share price and tertiary (classic: minority) is always 5×. The 2015 secondary column is not a multiple of anything — it is a printed lookup and must ship as data. Verified against the rulebook's own example: a five-tile tier-3 corporation pays 7,000 / 5,000 / 3,500.									

Bonus ties, worked the position on the board opposite, settled under both rule sets

THE POSITION		CLASSIC — 2 BONUSES		2015 — 3 BONUSES	
Enrun goes defunct at	6 tiles	Primary	\$7,000	Primary	\$7,000
Share price	\$700	Minority	\$3,500	Secondary	\$5,000
You	3 shares	Tie for primary	$(7,000 + 3,500) \div 2$	Tertiary	\$3,500
Nadia	3 shares	You / Nadia	\$5,250 each	Tie for primary	$(7,000 + 5,000) \div 2$
June	1 share	June	nothing	You / Nadia	\$6,000 each
Ravi	0 shares	Ravi	nothing	June, now secondary	\$3,500
TIE · PRIMARY	Combine primary and secondary, halve, round up to the nearest 100. The next holder down becomes secondary and receives the tertiary bonus; the tertiary bonus is then spent. <i>Classic: combine primary and minority.</i>				
TIE · SECONDARY	Combine secondary and tertiary, halve, round up. The third-most holder receives nothing. <i>Classic: split the minority bonus.</i>				
TIE · TERTIARY	Split the tertiary bonus, round up. 2015 only.				
SOLE SHAREHOLDER	One holder takes the primary and the tertiary bonus — not the secondary. <i>Classic: takes both bonuses.</i>				

Invariants things the engine must never allow to drift

Stock is finite 25 shares per corporation, 7 corporations, 175 total. An empty bank blocks buying, the founder's bonus and 2:1 trades alike — the founder simply gets nothing.	Active stock never sells Shares can only be turned into cash by a merger disposal or the final settlement. No loans, no player-to-player trading.
Broke is playable A player with no cash still places and draws; they just cannot buy. There is no elimination.	Purchases cap at three Per turn, across all corporations, and only in corporations already on the board.
Safe is permanent Once a corporation reaches the safe size it can never go defunct, though it can still absorb others and keep growing.	Two kinds of unplayable Permanently dead — would merge two safe corporations; discarded and replaced (2015). Temporarily blocked — would found an eighth corporation; stays in hand and may become playable later.
Ending is a choice A player may announce the end when a condition holds, or keep playing. They finish the turn after announcing.	Final settlement Pay bonuses for every active corporation as if it were merging, then the bank buys back all stock at the current price. Stock in a corporation not on the board is worth nothing.
Hidden information Tiles in hand and the face-down pile are always hidden. Cash and holdings are hidden or open by agreement — a per-table setting, not a rule.	A corporation has two names The base name belongss to the headquarters marker and never changes; the display name blends on every acquisition. Held defunct stock, refunding and the tile badge all key off the base name.
Tile draw is a bag Tiles are drawn from a shared face-down pile, not dealt. Running out of tiles is possible and ends nobody's turn early.	

Open questions decisions still to make

How big is the 2015 board? The rulebook lists 100 building tiles but never states the grid, and the only coordinates it prints are 1A, 2B and 9F. The classic 12 × 9 = 108 is unambiguous, so the engine should take dimensions as config and default to it.
Names have not been cleared The seven corporations, the city and the title are original. The published rules and mechanics are not protectable, but the original game's name and its corporation names are - and nothing here has been trademark-searched. That should happen before launch. Names, colours and tiers are pure data either way.
Round-up on split bonuses The 2015 rules say round up to the nearest 100; the classic rules say divide equally and are silent on rounding. Worth one config flag rather than two code paths.
